

## **3M™ Littmann® Cardiology IV™ Diagnostic Stethoscope (Red Tube, 28 in, 2113R)**

Dual-sided chestpiece with small 3.3cm diaphragm is ideal for pediatric patients. Dual-sided chestpiece and floating diaphragm provides high acoustic sensitivity for listening to low (bell) and high frequency sounds. Versatile chestpiece design provides high acoustic sensitivity with both a floating diaphragm and open bell. Non-chill rim and diaphragm provide patient comfort.

### **Features**

- Dual-sided chestpiece with small 3.3cm diaphragm is ideal for pediatric patients
  - Dual-sided chestpiece and floating diaphragm provides high acoustic sensitivity for listening to low (bell) and high frequency sounds
  - Versatile chestpiece design provides high acoustic sensitivity with both a floating diaphragm and open bell
  - Non-chill rim and diaphragm provide patient comfort
  - Soft-sealing eartips provide an excellent acoustic seal and comfortable fit
  - Headset is easily adjusted for individual fit and comfort; angled eartubes align with ear canals
  - Patient comfort is assured with rubber applied to the patient instead of metal when using the non-chill rim and diaphragm
- Five-year warranty includes free repair during this period for any manufacturing or material defect (excluding obvious abuse or accidental damage)
  - Three-year warranty includes free repair during this period for any manufacturing or material defect (excluding obvious abuse or accidental damage)
