

## TYNOR F-06 THUMB SPICA SPLINT

Tynor Thumb Spica Splint is a convenient and effective device for immobilizing the thumb in the abduction (functionally neutral) position. Supports the carpometacarpal joint (CMC) and immobilizes the metacarpophalangeal joint (MCP) of the thumb in a way that does not inhibit the movements of the hands.

### Attributes

- **REMOVABLE MALLEABLE SPLINT**  
Provides customized abduction of the thumb. Ensures excellent immobilization and stability to joints.
- **BREATHABLE 3 LAYERED PUF FUSED FABRIC**  
Durable, has excellent aesthetics and is very comfortable.
- **ERGONOMIC DESIGN**  
The ergonomic design allows full hand and finger movement. It is sleek, trendy and comfortable.
