

## TYNOR H-23 ORTHO CUSHION SEAT

Tynor's Ortho Cushion Seat is anatomically designed to ensure correct sitting posture, distribute body weight and guides the lower back to its neutral position. It is molded out of high density, superior quality PU foam to provide firm support, high cushioning and desired comfort. It has a cut out for anal and the tail bone area relief.

### Attributes

- High resilience foam Provides high cushioning and firm support which promotes correct sitting posture with proper spine alignment while ensuring a long functional life of the product.
- Anatomic Design Contoured surface of the product distributes body weight across the seat providing zero pressure on the tailbone and anal area thus relieving pain in sciatica, inflammation of coccyx, piles, anal fissures, surgeries etc.
- Lightweight material The product is highly portable. Perfect carry for long sitting hours at the office as well as general everyday use.
- Elegant fabric cover Is washable, offers premium aesthetics and a super soft and plush feel.
