

TYNOR J-04 WRIST WRAP NEOPRENE

Wrist Wrap Neoprene is designed to support, protect and partially immobilize the wrist. It compresses the area and retains the body heat to allay local pain and inflammation.

Attributes

- NEOPRENE LAYER BONDED WITH NYLON FABRIC ON BOTH SIDES

This fabric is four-way stretchable Neoprene bonded nylon. It provides optimal compression, comfort, grip, and durability.

- APPEALING AESTHETICS

It has appealing aesthetics with good color fastness. It retains body heat for pain relief and quicker healing.

- WRAP AROUND DESIGN

Wrap around design and UBL fabric offers a versatile closing system, ensures easy wearing and removal.
